

Church Farm Tent Layout Options

Key

Main Marquee - The best aspect is to face South. In this position, you have the best view and get the most sunlight throughout the day.

Catering tent/area - Having your catering tent at this end means it is slightly hidden from view and the access is easier from the service track

Band or/ and dance floor - positioning your band on this side means they have easy access from the track for set up and also the sound is travelling away from our neighbours. If your dance floor is separate to the rest of your marquee, this means you don't need clear and move tables and chairs when the dancing starts!

Bar / Chill-out Tent - This space can be used for a bar or chill out area. At this end it is well positioned away from the dance floor and easy for bar/catering staff to service

Regardless of your choice and shape of "tent" we have found that this rough layout works well for Bride & Groom, guests, bar staff, band and caterers. It is tried and tested so we would encourage you to follow roughly the same pattern.

Church Farm, Middle Common, Kington Langley, Chippenham, Wiltshire, SN15 5NN.
